Management: Matthias Dölz, Georg Haas

Münchenbernsdorfer Folien GmbH

Many years of experience of our management and staff in making, printing and processing polyethylene films are the basis when it comes to the planning, extension and day-to-day business of this company.
We use state-of-the-art machinery to make automatic machine and shrink films, flat films, tubular films, coex films, printed films, bags and sacks.The number of staff has risen from initially 17 to now over 65.

Production is 24 hours a day to ensure ontime delivery for our customers in Germany, the EU and elsewhere in the world.

Packaging material dealers prefer MF GmbH products because at Münchenbernsdorf you can t get films ready-to-use , instead we tailor our products to the needs of our customers. A speciality of ours is anti-corrosion film and semiconducting material.

Certified

DIN EN ISO 14001: 2009
